Description: Erection of a Solar Photovoltaic Farm with an output capacity not to exceed 49.9 MW of energy, with associated battery storage and supporting infrastructure including inverters and a transformer, fencing, CCTV installation and landscaping works. AMENDED PLANS
- OPC comments OPC objects to this proposal. Our previous objection gives full details of why we consider this to be a development that would cause considerable harm to the countryside.
- To summarise, it goes against several national and local policies:
1. Odiham & North Warnborough Neighbourhood Plan policies 5 and 12 - hedging, views, biodiversity

2. Hart District Landscape Assessment - the undulating character of the site and its immediate environs which is typical of the wider landscape would be seriously adversely affected with solar panels, as engineered products with an industrial appearance, perimeter fencing, CCTV towers, inverter housing and substation buildings (8 x 40ft containers). This would give an industrial character to this rural location.
3. NPPF 170b - this land is classified as 3a (best and most versatile agricultural land) and should not be prioritised for development.
4. Hart Local Plan 32 NBE2 - this requires **no** adverse impact, not negligible impact and this proposal will cause serious impact to the visual amenity and scenic quality of the landscape.
5. Effect on sites of SSSI - Greywell Fen and Basingstoke Canal - caused by drainage and biodiversity issues

We fully support the objections submitted by other Parish Councils, The Odiham Society and The Whitewater Valley Preservation Society.
